Personal Profile

I am a multipotential who is loves research and has adopted the principle of lifelong learning. I spend my time and energy for personal and technical development. Reading a book or have a lot of knowledge is not a success unless you meet the needs of others. I am able to produce value in the sector. In 2015, i entered this sector as Freelancer. This choice not only to advanced me in the field of technical training, also improved me in customer relations

Work Experience

Freelance

Developer (January 2015 - Now)

I performed my first work on a local platform in 2015. After attaining a certain competence in foreign languages, i continue my works on a global scale.

Modalobby

Full Stack Developer (March 2019 - May 2019)

I knew my inability of teamwork because I worked alone in my previous works. Also a reason I joined this project, where I learned technologies like PostgreSQL and Redis, was to learn teamwork. I worked mostly as a PHP Developer on this project where we use Git and Bitbucket for collaborative work. In addition to developing PHP, I made design improvements and developed jQuery modules.

Tüpraş

Summer Internship (August 2015 - September 2015)

Together with the office environment and professional tools reserved for trainees, the company provided a very good working environment. Besides providing hardware support to employees, I was also developing software in my spare time.

Key Skills

Php (9 / 10)
Html, Css, Javascript (9 / 10)
Facebook, Prestashop, Vimeo, Teachable, Google, Microsoft APIs (8 / 10)
Jquery, Ajax, Datatable, CKEditor (9 / 10)
Android Development, Java (8 / 10)
Android & Web Firebase Products (9 / 10)
MySQL, MSSQL, NoSQL, PostgreSQL, Redis (8 / 10)
Xml, Json, Html DOM (9 / 10)
Git, Github, Bitbucket (9 / 10)
Windows, Linux, Cmd, Bash (8 / 10)
Docker (7 / 10)

Projects

CVGEN

Php, Html, Css, Javascript, Json, JQuery

This is the cv builder that I used when creating my resume, which can be easily customized according to the related firm. I shared the source code on GitHub.

Eleman Yönlendir

Php, Mysql, Pdo, Html, Css, Javascript, JQuery

I made improvements (point system, dashboard improvements, and more) to my client's already active web software.

Domain Seller

Php, Mysql, Pdo, phpFastCache, Whois, Minify, PhpMailer, SmtP, Sha, Md5, Google reCaptcha, Html, Css, Javascript, JQuery, JQuery ajax, JQuery dataTables, JQuery bxSlider, JQuery scrollTo, ckEditor with Api, Bootstrap, notific8, font awesome, tag basic

In this project, which developed the entire backend part with php, all authorization processes are provided with tokens via emails.

Oto Lastikçi

Php, Mysql, Pdo, cUrl, PSWebServiceLibrary, SimpleXMLElement

I developed the fully automated distributor product integration software using the prestashop api to PrestaShop infrastructure e-commerce platform that my client is already actively using.

Yovipo

Php, Facebook Graph Api, Vimeo Api, Html, Css, Javascript, Skeleton Grid System, JQuery, JQuery ajax, JQuery tagsInput, JQuery autoComplete, JQuery niceScroll

I developed it so my client could easily upload videos to his facebook page and Vimeo account.

Certification

Java & Android Programming

Střední průmyslová škola elektrotechnická, (May 2016 - Permanent)

My first trip abroad was through a project called "Mobility - Young entrepreneurs who will be the future of mobile software" which I joined during high school. In addition to the Java programming trainings that lasted for 1 month, I also contributed to my foreign language education through cultural trips.

Languages

English

I do almost all my research in English. I can understand what I'm reading and listening to.

Education

Kocaeli University

Bachelor's Degree, Information Systems Engineering (2017 - 2022)

Hobbies

Learning

Learning on the road

To Design

Making 3D Models & Illustrations

Playing Violin

Target 10 thousand hours (%5)
